The Aeronautical Journal of the Royal Aeronautical Society

INCORPORATING THE INSTITUTION OF AERONAUTICAL ENGINEERS AND THE HELICOPTER ASSOCIATION OF GREAT BRITAIN

VOLUME LXXXIV

JANUARY–DECEMBER 1980

The following is based on the indexing of the RAeS Publications Index 1897–1977, recently published by the Society.

ACCIDENTS AND ACCIDENT INVESTIGATION
Structural integrity—the Accident Investigator's view, R. G. Feltham and K. P. R. Smart, pp 371–373 (Nov.).

AERODYNAMICS AND AERODYNAMIC DESIGN
Calculation of two-dimensional and three-dimensional regular shock intersections, B. L. Hunt, pp 285–289 (Sept.).
The effect of trailing-edge strips on the unsteady aerodynamic forces on a control surface, G. Long and P. A. Farrell, pp 388–391 (Nov.).
Rear body influence on base pressure, Indushekher Das and J. N. Mishra, pp 168–174 (May).
Variable camber airfoils, J. E. Chacksfield, pp 131–139 (May).

AERODYNAMICS: DRAG
The drag of slant-based bodies of revolution, D. J. Maull, pp 164–166 (June).

AERODYNAMICS: LIFT
Experimental study of flapping wing lift and propulsion, Ian Fejtek and John Nehera, pp 28–33 (Jan.).
Wing flapping with minimum energy, R. T. Jones, pp 214–217 (July).

AEROFOILS
Variable camber airfoils, J. E. Chacksfield, pp 131–139 (May).

AGRICULTURAL AVIATION
Aerial photography as an aid to pest forecasting, A. J. Hooper, pp 136–140 (June).
Design requirements of agricultural aircraft, R. C. Amsden, pp 144–146 (June).
The efficiency of aerial spraying, J. J. Spillman, pp 60–69 (Feb.).
The role of aircraft in the management of insect populations in crops in the year 2000, G. W. Schaefer, pp 131–135 (June).
The use of aerial photography in resolving problems in agriculture, M. A. Keech, pp 141–143 (June).

AGRICULTURAL AVIATION PHOTOGRAPHS
Edgley Optica, p 146 (June).
Lockspeiser Land Development aircraft, p 145 (June).
Locust, adult male (*Schistocerca gregaria*), Cover (Feb.).
PZL-106 Kruk (Raven) agricultural aircraft, Cover (June).

AIRCRAFT DESIGN
Combat aircraft development—looking backward to look forward 1935–1990, R. D. Boot, pp 349–357 (Nov.).
Design requirements of agricultural aircraft, R. C. Amsden, pp 144–146 (June).
Designing for long-life aircraft structures, N. F. Harpur, pp 358–364 (Nov.).
New technology in commercial aircraft design for minimum operating cost, D. J. Stewart and B. S. Campion, pp 50–59 (Feb.).

AIRCRAFT PHOTOGRAPHS
A300, p 1 (Jan.), and Cover (Dec.).
Buccaneer Mk. 2, p 152 (June).
Caravelle, p 395 (Dec.).
Coanda's 'turbo-propulseur' flying machine, p 409 (Dec.).
Concorde, Cover (March/April).
Edgley Optica, p 146 (June).
F-16, p 2 (Jan.).
Harrier, Cover (Sept.).
Harrier, p 264 (Sept.).
Jaguar, Cover (Jan.), and p 1 (Jan.).
Lockspeiser Land Development aircraft, p 145 (June).
Marcel Dassault Mirage 2000, Cover (Nov.).
McDonnell-Douglas AV8B, p 11 (Jan.).
Panavia Tornado F Mk. 2, Cover (Oct.).
PZL-106 Kruk (Raven) agricultural aircraft, Cover (June).
Super Guppy, p 400 (Dec.).

Helicopters
Sikorsky XH-59A, p 309 (Oct.).
Weir W.6, p 301 (Oct.).
Westland/Aerospatiale Puma, Cover (July).
Westland WG 33 mock-up, p 48 (Feb.).
Westland Wideye, p 48 (Feb.).

Man-powered aircraft
Gossamer Albatross, Cover (May).

AIRWORTHINESS
Airworthiness of long-life jet transport structures, Dr. U. G. Goranson and John Hall, pp 374–385 (Nov.).
The certification of composite airframe structures, P. R. Guyett and Dr. A. W. Cardrick, pp 188–203 (July).
The changing scene of structural airworthiness, W. G. Heath, pp 81–92 (March/April).
Continuing structural airworthiness of civil transport aircraft, P. F. Richards, pp 365–370 (Nov.).

ALBERS, F., SCHMIDT, D. W. and WAGNER, W. J.
Interaction of a vortex with a non-linear shear flow, pp 70–72 (Feb.).

AMSDEN, R. C.
Design requirements of agricultural aircraft, pp 144–146 (June).

AVIONICS
Back to basics—The philosophy adopted for the flight testing of the Panavia Tornado avionics system in hack aircraft, P. H. Morgan, pp 147–152 (June).

BABISTER, A. W.
Aircraft stability at high incidence, pp 73–75 (Feb.).

BALMFORD, D. E. H. and LOWSON, M. V.
Future advanced technology rotorcraft, pp 39–49 (Feb.).

BENNETT, H. W.
The development of the composite material engine nacelle, pp 209–213 (July).

BOOK REVIEWS—AUTHORS
Ashford, Norman and Wright, Paul, Airport Engineering, p 76 (Feb.).
Bertin, J. J. and Smith, M. L., Aerodynamics for Engineers, p 170 (June).
Bishop, R. E. D., Gladwell, G. M. L. and Michaelson, S., The Matrix Analysis of Vibration, p 34 (Jan.).
Cummins, Lyle, Internal Fire. The Internal Combustion Engine 1673–1900, p 392 (Nov.).
Duggan, T. V. and Byrne, J., Fatigue as a Design Criterion, p 175 (May).
Harker, Ronald W., The Engines were Rolls-Royce, p 346 (Oct.).
Haug, E. J. and Arora, J. A., Applied Optimal Design, p 124 (March/April).
John, James E. A. and Haberman, William L., Introduction to Fluid Mechanics. Second Edition, p 124 (March/April).
Kendal, Brian, Manual of Avionics, p 175 (May).
Lawson, T. V., Wind Effects on Buildings, p 392 (Nov.).
Maccabee, F., The Royal Aeronautical Society, Publications Index 1897–1977, p 256 (Aug.).
Marec, J. P., Optimal Space Trajectories, p 76 (Feb.).
McCormick, Barnes W., Aerodynamics, Aeronautics and Flight Mechanics, p 76 (Feb.).
Milne, R. D., Applied Functional Analysis. An Introductory Treatment, p 218 (July).
Pallett, E. H. J., Automatic Flight Control, p 175 (May).
Popescu, Julian, Russian Space Exploration. The First 21 Years, p 34 (Jan.).
Roscoe, Stanley N., Aviation Psychology, p 441 (Dec.).
Sayigh, A. A. M., Solar Energy Engineering, p 124 (March/April).
Vinh, N. X., Busemann, A., and Culp, R. D., Hypersonic and Planetary Entry Flight Mechanics, p 441 (Dec.).
Walshaw, A. C. and Jobson, D. A., Mechanics of Fluids—Third Edition, p 170 (June).
Whiteman, J. R. (Editor), The Mathematics of Finite Elements and Applications III, p 256 (Aug.).

BOOK REVIEWS—TITLES
Aerodynamics, Aeronautics and Flight Mechanics, Barnes W. McCormick, p 76 (Feb.).
Aerodynamics for Engineers, J. J. Bertin and M. L. Smith, p 170 (June).
Airport Engineering, Norman Ashford and Paul Wright, p 76 (Feb.).
Applied Functional Analysis. An Introductory Treatment, R. D. Milne, p 218 (July).
Applied Optimal Design, E. J. Haug and J. A. Arora, p 124 (March/April).
Automatic Flight Control, E. H. J. Pallett, p 175 (May).
Aviation Psychology, Stanley N. Roscoe, p 441 (Dec.).
The Engines were Rolls-Royce, Ronald W. Harker, p 346 (Oct.).
Fatigue as a Design Criterion, T. V. Duggan and J. Byrne, p 175 (May).
Hypersonic and Planetary Entry Flight Mechanics, N. X. Vinh, A. Busemann, and R. D. Culp, p 441 (Dec.).
Internal Fire. The Internal Combustion Engine 1673–1900, Lyle Cummins, p 392 (Nov.).
Introduction to Fluid Mechanics. Second Edition, James E. A. John and William L. Haberman, p 124 (March/April).
Manual of Avionics, Brian Kendal, p 175 (May).

The Mathematics of Finite Elements and Applications III, J. R. Whiteman (Editor), p 256 (Aug.).
The Matrix Analysis of Vibration, R. E. D. Bishop, G. M. L. Gladwell and S. Michaelson, p 34 (Jan.).
Mechanics of Fluids—Third Edition, A. C. Walshaw and D. A. Jobson, p 170 (June).
Optimal Space Trajectories, J. P. Marec, p 76 (Feb.).
The Royal Aeronautical Society, Publications Index 1897–1977, F. Maccabee, p 256 (Aug.).
Russian Space Exploration, Julian Popescu, p 34 (Jan.).
Solar Energy Engineering, A. A. M. Sayigh, p 124 (March/April).
Wind Effects on Buildings, T. V. Lawson, p 392 (Nov.).

BOOT, R. D.
Combat aircraft development—looking backward to look forward 1935–1990, pp 349–357 (Nov.).

BOUNDARY LAYERS
A numerical experiment on measured velocity distributions of turbulent pipe flow, J. C. Gibbings, pp 434–440 (Dec.).

BROWN, D. G.
Airbus Industrie—past, present and future, pp 395–407 (Dec.).

BUCKLING AND INSTABILITY OF STRUCTURES
Acoustic excitation of a panel having a central opening under biaxial tension, P. K. Datta and R. G. White, pp 339–345 (Oct.).

CAMPION, B. S. and STEWART, D. J.
New technology in commercial aircraft design for minimum operating cost, pp 50–59 (Feb.).

CARDRICK, Dr. A. W. and GUYETT, P. R.
The certification of composite airframe structures, pp 188–203 (July).

CHACKSFIELD, J. E.
Variable camber airfoils, pp 131–139 (May).

CHAPLEO, A. Q.
Some university experiences of aircraft simulator research, pp 223–226 (Aug.).

COCKPIT DESIGN
The advanced flight deck, J. W. Wilson and R. E. Hillman, pp 93–100 (March/April).

CORNEY, J. M.
The development of multiple redundant flight control systems for high integrity applications, pp 327–338 (Oct.).

CORRESPONDENCE
Chacksfield, J. E., Variable camber airfoils, p 243 (Aug.).
Goodhart, Rear Admiral H. C. N., Variable camber airfoils, p 243 (Aug.).

DAS, INDUSHEKHER and MISHRA, J. N.
Rear body influence on base pressure, pp 168–174 (May).

DATTA, P. K. and WHITE, R. G.
Acoustic excitation of a panel having a central opening under biaxial tension, pp 339–345 (Oct.).

ECONOMICS
New technology in commercial aircraft design for minimum operating cost, D. J. Stewart and B. S. Campion, pp 50–59 (Feb.).

EDUCATION AND TRAINING
Behavioural evaluations of simulators: academic and practical issues, R. B. Stammers, pp 227–229 (Aug.).
Flight simulation at Cranfield Institute of Technology, R. J. Golding, pp 236–237 (Aug.).
Simulation research: role of university, government and industry in the Netherlands, O. H. Gerlach, pp 233–235 (Aug.).
Some university experiences of aircraft simulator research, A. Q. Chapleo, pp 223–226 (Aug.).

EKIN, W. H. and McCLOY, D.
An objective method of assessing the realism of a simulation of a simple control system, pp 278–281 (Sept.).
The use of the power spectral density function to measure the effects of motion on an aircraft simulation, pp 101–107 (March/April).

ELECTRICAL AND ELECTRICAL SYSTEMS
The advanced flight deck, J. W. Wilson and R. E. Hillman, pp 93–100 (March/April).

ENERGY
Energy conservation—Designing systems for the least fuel penalty on the aircraft, R. Le Claire, pp 108–112 (March/April).

ENGINES
The development of the composite material engine nacelle, H. W. Bennett, pp 209–213 (July).
Ducted fan or the world's first jet plane? The Coanda claim re-examined, Frank H. Winter, pp 408–416 (Dec.).
The M.45SD-02 variable pitch geared fan engine demonstrator test and evaluation experience, G. H. Wright and J. G. Russell, pp 268–277 (Sept.).

ENGINE PHOTOGRAPHS
Coanda Turbo-Propulseur, p 409 (Dec.).
M.45SD-02, p 268 (Sept.).

FARRELL, P. A. and LONG, G.
The effect of trailing-edge strips on the unsteady aerodynamic forces on a control surface, pp 388–391 (Nov.).

FEJTEK, IAN and NEHERA, JOHN
Experimental study of flapping wing lift and propulsion, pp 28–33 (Jan.).

FELTHAM, R. G. and SMART, K. P. R.
Structural integrity—the Accident Investigator's view, pp 371–373 (Nov.).

FITZWILLIAMS, O. L. L.
A pursuit of the aerial carriage, pp 299–315 (Oct.).

FLIGHT CONTROL SYSTEMS
Design of control laws to implement ACT benefits, J. G. Jones, pp 13–21 (Jan.).
The development of multiple redundant flight control systems for high integrity applications, J. M. Corney, pp 327–338 (Oct.).
Developments in aircraft power flying control hydraulics, N. J. Honey, pp 153–163 (June).
Progress in the use of automatic flight controls in safety critical applications, R. W. Howard, pp 316–326 (Oct.).
The role of simulation in automatic flight control systems research, R. A. Prasad, S. L. A. Saoulis and L. Tsitsilonis, pp 238–243 (Aug.).

FLIGHT TESTING
Back to basics—The philosophy adopted for the flight testing of the Panavia Tornado avionics system in hack aircraft, P. H. Morgan, pp 147–152 (June).

FLUID MECHANICS
A numerical experiment on measured velocity distributions of turbulent pipe flow, J. C. Gibbings, pp 434–440 (Dec.).
Drag coefficient corrections for spheres in thin circular jets, R. S. Neve and P. Kotsiopoulos, pp 386–387 (Nov.).
Effect of contraction on screen-generated turbulence, E. G. Tulapurkara and V. Ramjee, pp 290–295 (Sept.).
Interaction of a vortex with a non-linear shear flow, F. Albers, D. W. Schmidt and W. J. Wagner, pp 70–72 (Feb.).

FLUTTER
The effect of trailing-edge strips on the unsteady aerodynamic forces on a control surface, G. Long and P. A. Farrell, pp 388–391 (Nov.).

FORSYTH, P. J. E., KIRKBY, W. T. and MAXWELL, R. D. J.
Design against fatigue—current trends, pp 1–12 (Jan.).

FUELS AND COMBUSTION
Energy conservation—Designing systems for the least fuel penalty on the aircraft, R. Le Claire, pp 108–112 (March/April).

GERLACH, O. H.
Simulation research: role of university, government and industry in the Netherlands, pp 233–235 (Aug.).

GIBBINGS, J. C.
A numerical experiment on measured velocity distributions of turbulent pipe flow, pp 434–440 (Dec.).

GOLDING, R. J.
Flight simulation at Cranfield Institute of Technology, pp 236–237 (Aug.).

GORANSON, Dr U. G. and HALL, JOHN
Airworthiness of long-life jet transport structures, pp 374–385 (Nov.).

GUYETT, P. R. and CARDRICK, Dr. A. W.
The certification of composite airframe structures, pp 188–203 (July).

HALL, JOHN and GORANSON, Dr. U. G.
Airworthiness of long-life jet transport structures, pp 374–385 (Nov.).

HAMMARSKJOLD, KNUT
Trends in international aviation and governmental policies, pp 144–156 (May).

HARPUR, N. F.
Designing for long-life aircraft structures, pp 358–364 (Nov.).

HART, Professor CLIVE
Carl Meerwein's ornithopter, pp 140–143 (May).
Swedenborg's flying saucer, pp 282–284 (Sept.).

HART, Professor CLIVE and HART, HELEN LINTHORNE
Melchior Bauer's cherub wagon, pp 22–27 (Jan.).

HEATH, W. G.
The changing scene of structural airworthiness, pp 81–92 (March/April).

HENSON AND STRINGFELLOW MEMORIAL LECTURE (25th)
A pursuit of the aerial carriage, O. L. L. Fitzwilliams, pp 299–315 (Oct.).

HILLMAN, R. E. and WILSON, J. W.
The advanced flight deck, pp 93–100 (March/April).

HISTORY
Carl Meerwein's ornithopter, Professor Clive Hart, pp 140–143 (May).
The changing scene of structural airworthiness, W. G. Heath, pp 81–92 (March/April).
Combat aircraft development—looking backward to look forward 1935–1990, R. D. Boot, pp 349–357 (Nov.).
Ducted fan or the world's first jet plane? The Coanda claim re-examined, Frank H. Winter, pp 408–416 (Dec.).
Melchior Bauer's cherub wagon, Professor Clive Hart and Helen Linthorne Hart, pp 22–27 (Jan.).

Swedenborg's flying saucer, Professor Clive Hart, pp 282–284 (Sept.).
Trends in international aviation and governmental policies, Knut Hammarskjöld, pp 144–156 (May).

HOLT, P. J. and WEBBER, J. P. H.
Finite elements for honeycomb sandwich plates and shells, Part 1, pp 113–123 (March/April), Part 2, pp 157–167 (May).

HONEY, N. J.
Developments in aircraft power flying control hydraulics, pp 153–163 (June).

HOOPER, A. J.
Aerial photography as an aid to pest forecasting, pp 136–140 (June).

HOWARD, R. W.
Progress in the use of automatic flight controls in safety critical applications, pp 316–326 (Oct.).

HOWELL, T. F.
Status of European telecommunication satellite development, pp 244–252 (Aug.).

HUNT, B. L.
Calculation of two-dimensional and three-dimensional regular shock intersections, pp 285–289 (Sept.).

HYDRAULICS AND HYDRAULIC SYSTEMS
Developments in aircraft power flying control hydraulics, N. J. Honey, pp 153–163 (June).

INDUSTRY
Towards a new industrial revolution, Sir Frederick W. Page, pp 261–267 (Sept.).

INSTRUMENTATION
The advanced flight deck, J. W. Wilson and R. E. Hillman, pp 93–100 (March/April).

INTERNATIONAL, INCLUDING INTERNATIONAL COLLABORATION
Airbus Industrie—past, present and future, D. G. Brown, pp 395–407 (Dec.).
Simulation research: role of university, government and industry in the Netherlands, O. H. Gerlach, pp 233–235 (Aug.).
Status of European telecommunication satellite development, T. F. Howell, pp 244–252 (Aug.).
Trends in international aviation and governmental policies, Knut Hammarskjöld, pp 144–156 (May).

JONES, J. G.
Design of control laws to implement ACT benefits, pp 13–21 (Jan.).

JONES, R. T.
Wing flapping with minimum energy, pp 214–217 (July).

KEECH, M. A.
The use of aerial photography in resolving problems in agriculture, pp 141–143 (June).

KIRKBY, W. T., FORSYTH, P. J. E. and MAXWELL, R. D. J.
Design against fatigue—current trends, pp 1–12 (Jan.).

KITCHENSIDE, A. W.
Engineering aspects of composite structures for civil aircraft, pp 204–209 (July).

KOTSIOPOULOS, P. and NEVE, R. S.
Drag coefficient corrections for spheres in thin circular jets, pp 386–387 (Nov.).

LE CLAIRE, R.
Energy conservation. Designing systems for the least fuel penalty on the aircraft, pp 108–112 (March/April).

LONG, G. and FARRELL, P. A.
The effect of trailing-edge strips on the unsteady aerodynamic forces on a control surface, pp 388–391 (Nov.).

LOWSON, M. V. and BALMFORD, D. E. H.
Future advanced technology rotorcraft, pp 39–49 (Feb.).

MAN-POWERED AIRCRAFT
Carl Meerwein's ornithopter, Professor Clive Hart, pp 140–143 (May).
Melchior Bauer's cherub wagon, Professor Clive Hart and Helen Linthorne Hart, pp 22–27 (Jan.).
Swedenborg's flying saucer, Professor Clive Hart, pp 282–284 (Sept.).

MATERIALS
Applications of carbon fibre composites to military aircraft structures, T. Sharples, pp 177–182 (July).
The certification of composite airframe structures, P. R. Guyett and Dr. A. W. Cardrick, pp 188–203 (July).
The development of the composite material engine nacelle, H. W. Bennett, pp 209–213 (July).
Engineering aspects of composite structures for civil aircraft, A. W. Kitchenside, pp 204–209 (July).
The manufacture of composite rotor blades, R. J. Wilson, pp 183–187 (July).

MAULL, D. J.
The drag of slant-based bodies of revolution, pp 164–166 (June).

MAXWELL, R. D. J., FORSYTH, P. J. E. and KIRKBY, W. T.
Design against fatigue—current trends, pp 1–12 (Jan.).

McCLOY, D. and EKIN, W. H.
An objective method of assessing the realism of a simulation of a simple control system, pp 278–281 (Sept.).
The use of the power spectral density function to measure the effects of motion on an aircraft simulation, pp 101–107 (March/April).

MILITARY AVIATION
Combat aircraft development—looking backward to look forward 1935–1990, R. D. Boot, pp 349–357 (Nov.).

MISHRA, J. N. and DAS, INDUSHEKHER
Rear body influence on base pressure, pp 168–174 (May).

MITCHELL MEMORIAL LECTURE (26th)
Airbus Industrie—past, present and future, D. G. Brown, pp 395–407 (Dec.).

MOHAN, S. R. and STOLLERY, J. L.
A study of the temperatures achievable by expansion of high pressure gas, pp 253–255 (Aug.).

MORGAN, P. H.
Back to basics—the philosophy adopted for the flight testing of the Panavia Tornado avionics system in hack aircraft, pp 147–152 (June).

NEHERA, JOHN and FEJTEK, IAN
Experimental study of flapping wing lift and propulsion, pp 28–33 (Jan.).

NEVE, R. S. and KOTSIOPOULOS, P.
Drag coefficient corrections for spheres in thin circular jets, pp 386–387 (Nov.).

ORNITHOPTERS
Carl Meerwein's ornithopter, Professor Clive Hart, pp 140–143 (May).
Experimental study of flapping wing lift and propulsion, Ian Fejtek and John Nehera, pp 28–33 (Jan.).
Melchior Bauer's cherub wagon, Professor Clive Hart and Helen Linthorne Hart, pp 22–27 (Jan.).
Swedenborg's flying saucer, Professor Clive Hart, pp 282–284 (Sept.).
Wing flapping with minimum energy, R. T. Jones, pp 214–217 (July).

PAGE, Sir FREDERICK
Towards a new industrial revolution, pp 261–267 (Sept.).

PHOTOGRAPHY
Aerial photography as an aid to pest forecasting, A. J. Hooper, pp 136–140 (June).
The use of aerial photography in resolving problems in agriculture, M. A. Keech, pp 141–143 (June).

PRASAD, R. A., SAOULLIS, S. L. A. and TSITSILONIS, L.
The role of simulation in automatic flight control systems research, pp 238–243 (Aug.).

RAMJEE, V. and TULAPURKARA, E. G.
Effect of contraction on screen-generated turbulence, pp 290–295 (Sept.).

RESEARCH
Some university experiences of aircraft simulator research, A. Q. Chapleo, pp 223–226 (Aug.).

RICHARDS, P. F.
Continuing structural airworthiness of civil transport aircraft, pp 365–370 (Nov.).

ROTORCRAFT
A pursuit of the aerial carriage, O. L. L. Fitzwilliams, pp 299–315 (Oct.).
Future advanced technology rotorcraft, M. V. Lowson and D. E. H. Balmford, pp 39–49 (Feb.).
The manufacture of composite rotor blades, R. J. Wilson, pp 183–187 (July).

RUSSELL, J. G. and WRIGHT, G. H.
The M.45SD-02 variable pitch geared fan engine demonstrator test and evaluation experience, pp 268–277 (Sept.).

SAFETY
Progress in the use of automatic flight controls in safety critical applications, R. W. Howard, pp 316–326 (Oct.).
Structural integrity—the Accident Investigator's view, R. G. Feltham and K. P. R. Smart, pp 371–373 (Nov.).

SAOULLIS, S. L. A., PRASAD, R. A. and TSITSILONIS, L.
The role of simulation in automatic flight control systems research, pp 238–243 (Aug.).

SCHAEFER, G. W.
The role of aircraft in the management of insect populations in crops in the year 2000, pp 131–135 (June).

SCHMIDT, D. W., WAGNER, W. J. and ALBERS, F.
Interaction of a vortex with a non-linear shear flow, pp 70–72 (Feb.).

SHARPLES, T.
Applications of carbon fibre composites to military aircraft structures, pp 177–182 (July).

SIMPSON, A.
The Kron methodology and practical algorithms for eigenvalue, sensitivity and response analyses of large scale structural systems, pp 417–433 (Dec.).

SIMULATION AND SIMULATORS
A modular low-cost raster-scan colour visual system, P. J. Willis, pp 230–232 (Aug.).
The advanced flight deck, J. W. Wilson and R. E. Hillman, pp 93–100 (March/April).

An objective method of assessing the realism of a simulation of a simple control system, W. H. Ekin and D. McCloy, pp 278–281 (Sept.).
Behavioural evaluations of simulators: academic and practical issues, R. B. Stammers, pp 227–229 (Aug.).
Flight simulation at Cranfield Institute of Technology, R. J. Golding, pp 236–237 (Aug.).
The role of simulation in automatic flight control systems research, R. A. Prasad, S. L. A. Saoullis and L. Tsitsilonis, pp 238–243 (Aug.).
Simulation research: role of university, government and industry in the Netherlands, O. H. Gerlach, pp 233–235 (Aug.).
Some university experiences of aircraft simulator research, A. Q. Chapleo, pp 223–226 (Aug.).
The use of the power spectral density function to measure the effects of motion on an aircraft simulation, W. H. Ekin and D. McCloy, pp 101–107 (March/April).

SMART, K. P. R. and FELTHAM, R. G.
Structural integrity—the Accident Investigator's view, pp 371–373 (Nov.).

SPACE AND SPACECRAFT
Status of European telecommunication satellite development, T. F. Howell, pp 244–252 (Aug.).

SPACE AND SPACECRAFT PHOTOGRAPHS
ESA Orbital Test Satellite, OTS, Cover (Aug.).

SPILLMAN, J. J.
The efficiency of aerial spraying, pp 60–69 (Feb.).

STABILITY AND CONTROL
Aircraft stability at high incidence, A. W. Babister, pp 73–75 (Feb.).
Design of control laws to implement ACT benefits, J. G. Jones, pp 13–21 (Jan.).

STAMMERS, R. B.
Behavioural evaluations of simulators: academic and practical issues, pp 227–229 (Aug.).

STEWART, D. J. and CAMPION, B. S.
New technology in commercial aircraft design for minimum operating cost, pp 50–59 (Feb.).

STOLLERY, J. L. and MOHAN, S. R.
A study of the temperatures achievable by expansion of high pressure gas, pp 253–255 (Aug.).

STRUCTURES AND STRUCTURAL DESIGN
Acoustic excitation of a panel having a central opening under biaxial tension, P. K. Datta and R. G. White, pp 339–345 (Oct.).
Airworthiness of long-life jet transport structures, Dr. U. G. Goranson and John Hall, pp 374–385 (Nov.).
Applications of carbon fibre composites to military aircraft structures, T. Sharples, pp 177–182 (July).
The certification of composite airframe structures, P. R. Guyett and Dr. A. W. Cardrick, pp 188–203 (July).
The changing scene of structural airworthiness, W. G. Heath, pp 81–92 (March/April).
Continuing structural airworthiness of civil transport aircraft, P. F. Richards, pp 365–370 (Nov.).
Design against fatigue—current trends, W. T. Kirkby, P. J. E. Forsyth and R. D. J. Maxwell, pp 1–12 (Jan.).
Designing for long-life aircraft structures, N. F. Harpur, pp 358–364 (Nov.).
Engineering aspects of composite structures for civil aircraft, A. W. Kitchenside, pp 204-209 (July).
Finite elements for honeycomb sandwich plates and shells, P. J. Holt and J. P. H. Webber, Part 1, pp 113–123 (March/April), Part 2, pp 157–167 (May).
The Kron methodology and practical algorithms for eigenvalue, sensitivity and response analyses of large scale structural systems, A. Simpson, pp 417–433 (Dec.).
Structural integrity—the Accident Investigator's view, R. G. Feltham and K. P. R. Smart, pp 371–373 (Nov.).

SUPERSONICS AND HYPERSONICS
Calculation of two-dimensional and three-dimensional regular shock intersections, B. L. Hunt, pp 285–289 (Sept.).
Rear body influence on base pressure, Indushekher Das and J. N. Mishra, pp 168–174 (May).

SYSTEMS AND SYSTEM ANALYSIS
A modular low-cost raster-scan colour visual system, P. J. Willis, pp 230–232 (Aug.).
Energy conservation—Designing systems for the least fuel penalty on the aircraft, R. Le Claire, pp 108–112 (March/April).

TESTING
The M.45SD-02 variable pitch geared fan engine demonstrator test and evaluation experience, G. H. Wright and J. G. Russell, pp 268–277 (Sept.).

TSITSILONIS, L., SAOULLIS, S. L. A. and PRASAD, R. A.
The role of simulation in automatic flight control systems research, pp 238–243 (August).

TULAPURKARA, E. G.
Studies on Thwaites' method for wind tunnel contraction, pp 167–169 (June).

TULAPURKARA, E. G. and RAMJEE, V.
Effect of contraction on screen-generated turbulence, pp 290–295 (Sept.).

VIBRATION
The Kron methodology and practical algorithms for eigenvalue, sensitivity and response analyses of large scale structural systems, A. Simpson, pp 417–433 (Dec.).

VORTEX WAKES
Interaction of a vortex with a non-linear shear flow, F. Albers, D. W. Schmidt and W. J. Wagner, pp 70–72 (Feb.).

WAGNER, W. J., ALBERS, F. and SCHMIDT, D. W.
Interaction of a vortex with a non-linear shear flow, pp 70–72 (Feb.).

WEBBER, J. P. H. and HOLT, P. J.
Finite elements for honeycomb sandwich plates and shells, Part 1, pp 113–123 (March/April), Part 2, pp 157–167 (May).

WHITE, R. G. and DATTA, P. K.
Acoustic excitation of a panel having a central opening under biaxial tension, pp 339–345 (Oct.).

WILLIS, P. J.
A modular low-cost raster-scan colour visual system, pp 230–232 (Aug.).

WILSON, J. W. and HILLMAN, R. E.
The advanced flight deck, pp 93–100 (March/April).

WILSON, R. J.
The manufacture of composite rotor blades, pp 183–187 (July).

WIND TUNNELS AND WIND TUNNEL TESTING
A study of the temperatures achievable by expansion of high pressure gas, S. R. Mohan and J. L. Stollery, pp 253–255 (Aug.).
The drag of slant-based bodies of revolution, D. J. Maull, pp 164–166 (June).
Effect of contraction on screen-generated turbulence, E. G. Tulapurkara and V. Ramjee, pp 290–295 (Sept.).
The effect of trailing-edge strips on the unsteady aerodynamic forces on a control surface, G. Long and P. A. Farrell, pp 388–391 (Nov.).
Rear body influence on base pressure, Indushekher Das and J. N. Mishra, pp 168–174 (May).
Studies on Thwaites' method for wind tunnel contraction, E. G. Tulapurkara, pp 167–169 (June).

WINGS
Experimental study of flapping wing lift and propulsion, Ian Fejtek and John Nehera, pp 28–33 (Jan.).
Variable camber airfoils, J. E. Chacksfield, pp 131–139 (May).
Wing flapping with minimum energy, R. T. Jones, pp 214–217 (July).

WINTER, FRANK H.
Ducted fan or the world's first jet plane? The Coanda claim re-examined, pp 408–416 (Dec.).

WRIGHT, G. H. and RUSSELL, J. G.
The M.45SD-02 variable pitch geared fan engine demonstrator test and evaluation experience, pp 268–277 (Sept.).
